# **Sustainability Internet of Things (IoT) Coordinator**

Project Title	Sustainability Internet of Things (IoT) Coordinator
Summary	Come intern with the Greening Diplomacy Initiative to support the Department's development and implementation of advanced environmental technologies at our domestic and overseas posts.
Country	United States

### **Project Description**

The Greening Diplomacy Initiative at the Department of State manages a variety of IoT devices that support our environmental goals to manage our global footprint efficiently and effectively and showcase the best of U.S. environmental technology at our overseas posts. We are seeking a virtual intern that has some experience or interest in Microsoft Azure, Amazon Web Service, Internet Of Things, Python, scripts, etc. You will be part of an innovative team of analysts and technologists that are working to implement the latest technologies for global reporting and data analysis for our environmental systems.
